

***Longitude, An Appeal to the Public.....* by Thomas Earnshaw, London 1808**

INDEX by Jonathan Betts © 2000

Note A: Certain key names and words appear so frequently in the text that indexing is pointless. For the sake of completeness, these references are simply marked: "throughout"

Note B: Where references appear in sequence totalling more than 4 pages, blocks are cited which can include up to two pages without a reference (e.g. if pages 1,2,3,4,7,8,9 have a reference it will be shown as 1-9, but 1,2,3,7,8,9 will be shown as 1-3, 7-9).

Note C: There is no page 233 in the book but there are two pages 236 (referred to in the index as 236 and 236a). The three pages of Introduction are not paginated in the book, but have been allocated numbers i) to iii) for the Index.

Note D: E.I. refers to the East India Company (E.L.captains in the index are in bold and E.I. ships are in bold italics). R.N. refers to the Royal Navy (R.N. ships in the index are in plain italics)
